

Future of SMPs: Digital Transformation

Future of SMPs: Digital Transformation

Webinar, 4 March 2021

Housekeeping

- **Please select your language preference (German channel has Georgian translation)**
- **Please type any questions you have into the message chat stating your name and organisation (preferably in English)**
- **Please note that the event will be recorded (in Georgian)**
- **Video recording and slides (pdf with hyperlinks to sources & readings in EN unless otherwise stated) will be available after event**

Presenters

Martin de Bie

Advisor, New Technology & Cross Industry Innovation and Chair, EFAA Digital Working Group

Paul Thompson

Director, EFAA for SMEs and World Bank Consultant

Agenda

- Opening Remarks (*5 minutes*)
- Practice Transformation – Paul Thompson (*10 minutes*)
- How to Digitalize Your Practice – Martin de Bie (*45 minutes*)
- SMP Pacesetters Embracing Technology – Paul Thompson (*5 minutes*)
- Questions and Answers (Q&A) – Irina Gordeladze (*20 minutes*)
- Closing Remarks - Paul Thompson (*5 minutes*)
- Reading

Opening Remarks

- More than ever before the SMP (Small and Medium Sized Practice) is the trusted adviser to smaller businesses, and the Covid-19 crisis is a call to arms for smaller accountancy firms to transform further. Digital transformation of SMPs is key to accelerating the pace of change, ensuring durability, and driving better understanding of client needs.”
- “The pandemic has, in fact, accelerated digital adoption in areas such as e-commerce (for reaching clients) and remote working (for reaching staff) that relate directly to maintaining operations.”

[COVID-19 - the SMP's road to recovery](#), ACCA

Practice Transformation – Introduction

Practice Transformation Action Plan – A Road Map to the Future

- Embrace Change
- Leverage Technology
- Focus on Talent Management
- Evolve the Firm Operating Model and Build Advisory Services

Practice Transformation Action Plan – A Roadmap to the Future

Practice Transformation - Adopt & Embed Technology I

1. Conduct an Environmental Scan
2. Align with the Long-Term Strategy & Formulate a Realistic Implementation Plan
3. Adopt the Cloud
4. Involve Clients in Technology Decisions
5. Identify and Support an Internal Technology Champion

Practice Transformation - Leverage Technology I

- **Embracing technology critical to**
 - Improve practice efficiencies
 - Enhance service delivery
 - Motivate staff
 - Expand services
- **Requires**
 - Continuous investment
 - Discussion with other firms and clients
 - Cloud technology

Practice Transformation - Leverage Technology II

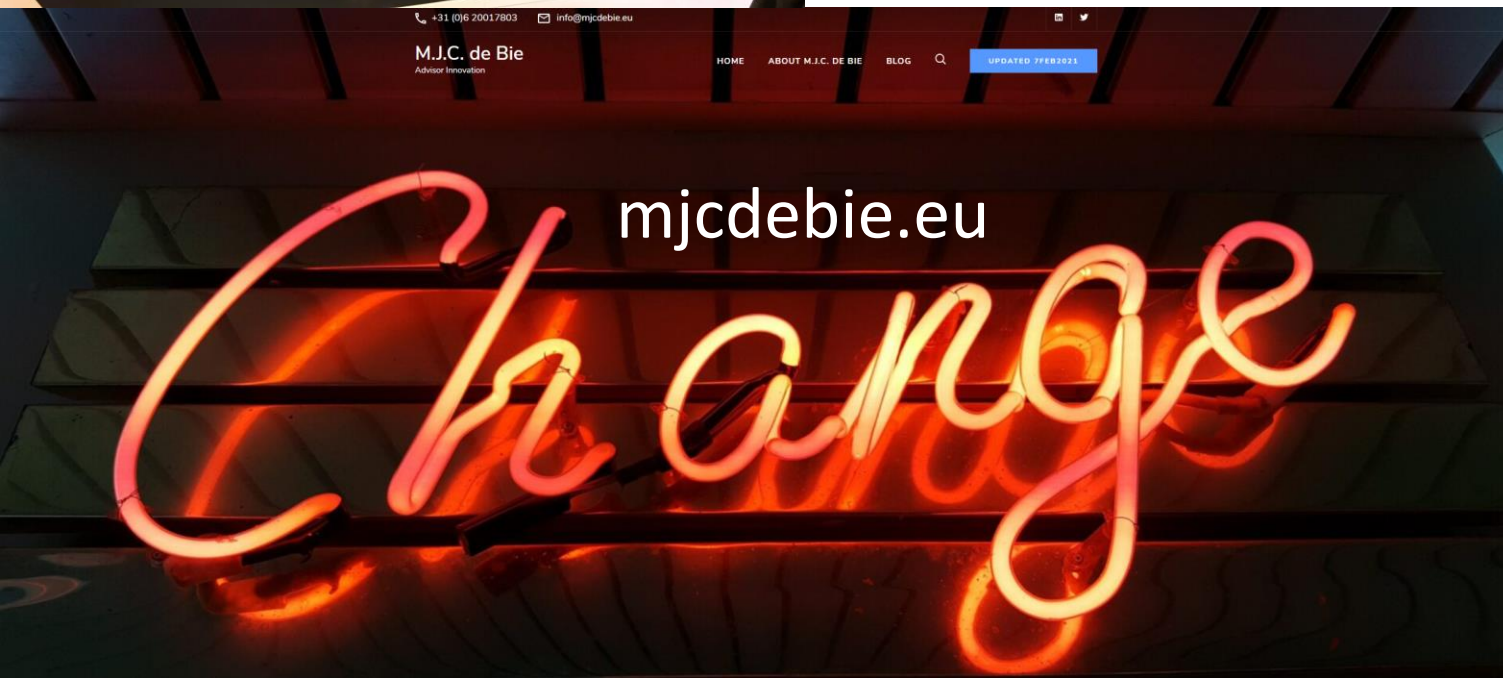

- **Successful adoption & implementation involves**
 - A coordinated approach and strategic plan
 - Internal champions
 - Procedures being designed and enforced
 - Ongoing training for staff at all levels

Martin de Bie

Advisor new technology & cross industry innovation

Digital Transformation Isn't Easy It's a Strategy

4 WAYS HOW TO BECOME A DIGITAL CPA

- 1 Use of Cloud**
Use the power of cloud technology. It provides various features like team collaboration, remote access, reduced IT maintenance, device independence and a lot more, which can increase your productivity at a gradual rate.
- 2 Available 24x7**
Use of mobile has almost removed the communication gaps. Being available (using smartphone or another portable device) for clients and team members even when you are not in the office enhances reachability. It keeps the operations go on, uninterrupted.
- 3 Presence on Social Media Platforms**
Social media platforms like LinkedIn, Facebook, and Twitter can help you to connect with your clients or like-minded people, and also will serve you as a way to promote and brand yourself in the industry.
- 4 Data Security**
Data security is an essential concern for accountants. As digital technologies protect the data better, you should choose that as well. The choice of accounting technologies (such as accounting software, cloud service, etc.) should rely on the level of protection they can offer.

Digital Strategy is a Well Thought Process

Why SMPs Need to Move to Digitized Services

The unprecedented disruption by COVID-19 is accelerating the urgency for agility, adaptability and transformation. Industry structures and business models are being disrupted – and the digitalization of the economy is being rapidly accelerated.

An estimated 70% of new value created in the economy over the next decade will be based on digitally enabled platform business models.

Moving to fully digitized services is now more crucial than ever

As new demand for distributed digital engagement rises, businesses need to solve remote workforce, network efficiency and workflow latency issues.

70% of new value created over the next decade will be based on digitally enabled business models.

World Economic Forum's Shaping the Future of Digital Economy and New Value Creation Platform

Data Driven Approach

Compliance is now about speed, accuracy, and competitive pricing. But what clients really value are relationships, analysis, and advisory services. These things come from insights derived from real-time data – insights that can enable real business change.

To ensure an optimal client experience offer a **standard work process** composed of the following **best-of-breed** software solutions which integrate seamlessly with each other.

Focus on real-time data. It gives you visibility and access to all the financial information you need to complete compliance and deliver advisory services **efficiently** and **accurately**.

You can see everything with all historical and current client data from multiple sources stored in one location. Nothing goes unnoticed.

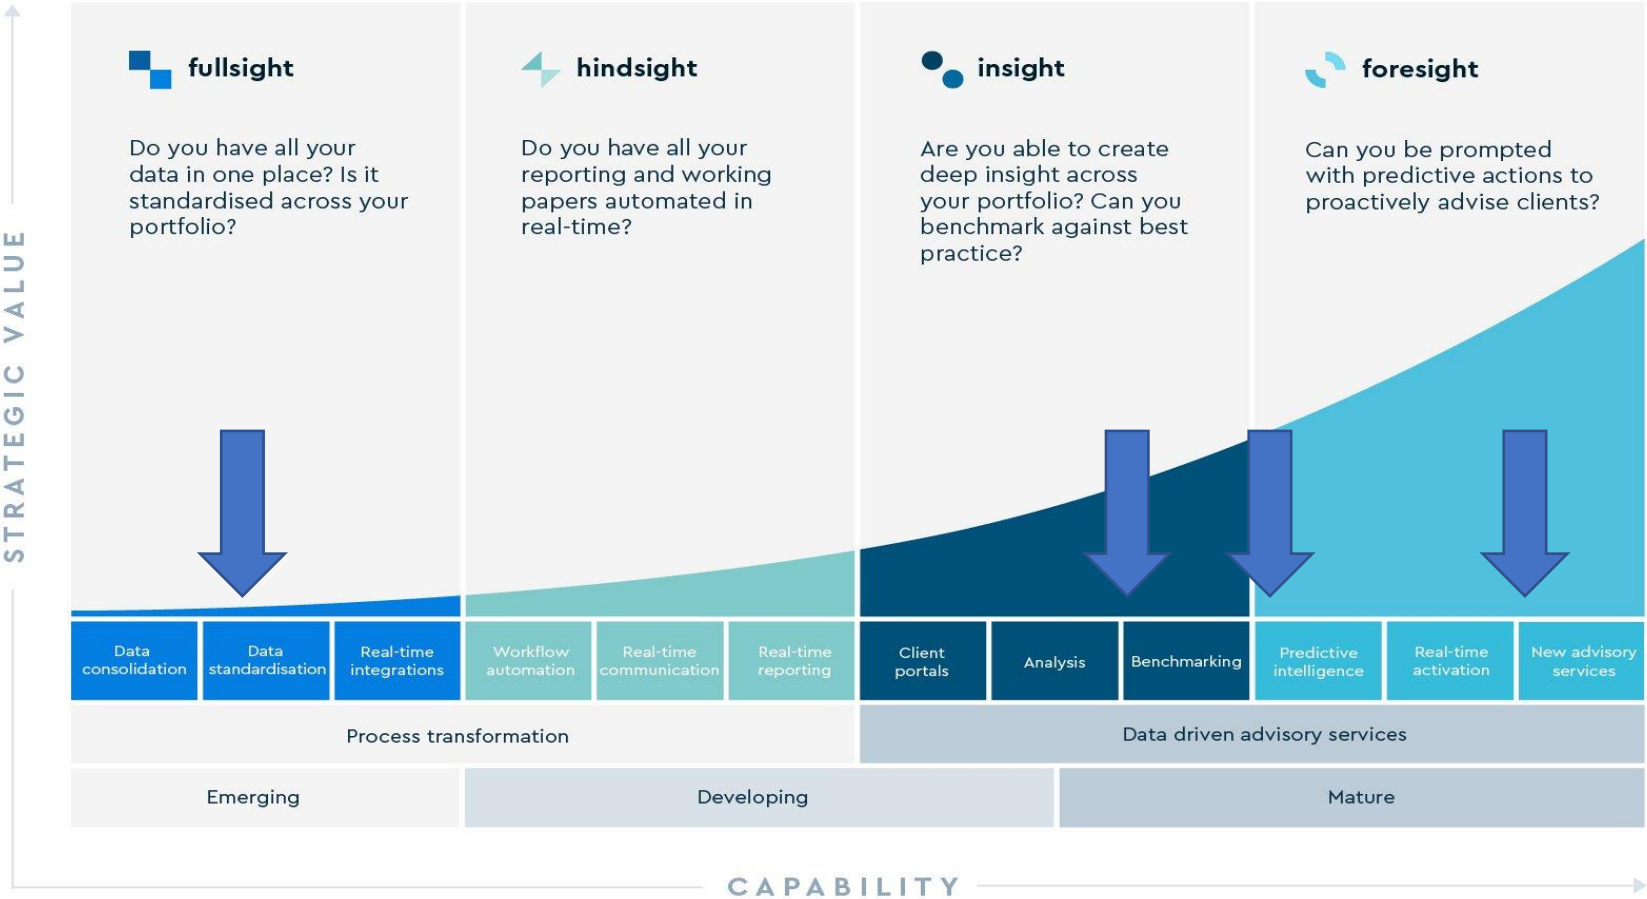

Real-time and automatic updates from your clients' systems ensure information is always up to date. Standardizing this data into a **common chart of accounts**, and a single data store, also makes automation possible.

Steps to Data Driven Services

silverfin data driven digital firm

connected accounting

Growth Opportunities

- Entrepreneurs really need an advisor and a listening ear. Accountants must focus on this and invest more in emotional and social skills.
 - IT and data skills are becoming more important to be a good business advisor. Accountants must be able to interpret data and convert it into powerful and relevant advice.
- Companies need to look ahead instead of backwards. The accountant must give instructions to the entrepreneur to keep his business running smoothly financially and technically.

- 1 New client acquisition
- 2 Increased advisory revenue
- 3 Margin-lifting efficiencies
- 4 Improving client retention

What is the Biggest Bottleneck for Growth?

*Accounting is the largest **BOTTLENECK** for scale & growth*

Capacity

Processing the accounting takes a lot of time, which is at the expense of customer contact and acquisition

Right people, wrong tasks

Accountants who have to focus on providing advice are too concerned with accounting

Attracting talent

Difficult to find qualified personnel to grow customer base

Reliability and timeliness

Poor quality and late delivery does not provide a good basis for advice

Trending: Bookkeeping will be Robotized

Value to CPA firm

Economic impact

Short-term

Weeks

IMPROVE BOOKKEEPING ACCURACY

- Increase categorization accuracy of all transactions to **99%**
- Less time spent fixing inaccuracies reduces costs and increases time spent on higher margin services

INCREASE BOOKKEEPING CAPACITY

- Reduce time spent on bookkeeping by **50-90%** to drive time on higher margin services & new client acquisition
- Increase staff to client ratio by over **300%**

IMPROVE CUSTOMER SATISFACTION

- Reduce 2-5 hours of time per client spent on redundant client inquiries
- Reduce 1-3 hours per client credentialing accounts
- Improved Timeliness
- Better Bookkeeping = Better Everything

Mid-term

Weeks/Months

INCREASE REVENUE

- Fast focus on new client acquisition opportunities
- Repurpose higher-level accountants to more advisory services

IMPROVE MARGIN

- Short term: improve margin 3-15%
- Eliminate/reduce managerial time spent on supervising/reviewing books by senior level accountants
- Decrease ramp up time of new staff servicing clients
- More Advisory Services adding to margin lift

IMPROVE CUSTOMER SATISFACTION

- Enhance client relationships by investing weekly/monthly calls on advisory versus data entry

Prominent Investor...

Long-term

Months/Quarters

NEW SERVICE MODEL

- Expand market of potential firms to acquire
- Grow multi-million dollar CAS Practice for firms without accounting services capabilities

GROWTH VIA ACQUISITION

- Acquire 1-4 firms annually
- Immediate increase in revenue/profit yields

COST REDUCTION

- Disconnect Scale & Staffing curves

ENHANCE RECRUITING

- Offer new skills to entry-level hires versus data entry work

Robotic is Machine Learning & Standardization

Introducing Reference Classification System of Financial Information (RCSFI)

Main Overview

Robotic +

	Sector	G/L Account	Article Code	Description	VAT Percentage
▾	00 - General	4204050 WBedAutOpa - Operational leasing auto's		lease...	21%
▾	00 - General	4204010 WBedAutBra - brandstofkosten auto's		Brand...	21%

Advantages

Use of RCSFI helps accountants improve service delivery to their clients:

- Administering accounts is more efficient since all accounts are referenced to a standard classification. Compilation of reports is more efficient due to the connection between the RCSFI and SBR
- Better insight: standardization allows for improved data exchange between systems
- Improved financial analysis through comparable data. Standardization also provides opportunities for government agencies to reciprocate data exchange by providing aggregate data
- Improved quality of financial accounts by connecting the general ledger with other systems in the financial administration (such as e-invoicing, salary administration and point of sale systems).

Source: <https://referentiegrootboekschema.nl/english>

How Does RCSFI Work in Practice?

Changes in value of financial fixed assets and securities (WWfa)	Proceeds from receivables belonging to fixed assets and securities (WOvt)
Other changes in value (WBwv)	Release of revaluation reserve (WVhe)
Other operating expenses (WBed)	Financial income and expenses (WFbe)
Taxes (WBel)	Share in the result of companies in which is participating tax on the profit or loss (WRed)
	Share of third parties (WAad)
	Net result after tax (WNer)
	Movement in old-age tax reserve (WMfo)

SMPs Have a Key Role in Financial Data Chain

The main objective of the [Early Warning Europe](#) project was to create strong framework conditions for entrepreneurs that can help them face key challenges, including managing a crisis, dealing with bankruptcy and getting a second chance.

SMPs Need to Look Ahead Instead of Backwards

How SMEs Think of SMPs on Digitalization Topic

SMEs expectations

■ Conclusion:

- Be a digitalized SMP to help SMEs perform better
- Accompany SMEs in their digitalisation process

Digital Competency Rating

Why is Digital Competence Important?

Digitalisation has [profound implications](#) for small- and medium-sized accountancy practices (SMPs). These implications will demand change. New digital technologies will continue to emerge. SMPs must anticipate these changes and be prepared to respond. SMPs, however, are typically resource constrained and in need of guidance and direction on how best to respond to these implications. This is where the Digital Competency Maturity Model (DCMM™) comes in.

What is the Digital Competency Maturity Model (DCMM™)?

The DCMM™ comprises a questionnaire that enables SMPs to rate their current level of maturity on digital competency, identify areas where competencies are strong or lacking, and then develop a road map for achieving a higher level of maturity.

Questions and Answers (Q&A)

Note – we are happy to receive after the webinar via email to Paul.Thompson@efaa.com and / or info@mjcdebie.eu

Closing Remarks

You are recommended to

- Make digital transformation a high priority – disrupt yourselves or be disrupted
- Digital transformation requires change of mindset, skillset and toolset
- Read IFAC's ['Practice Transformation Action Plan – A Roadmap to the Future'](#) and leverage technology using steps outlined
- **Look out for**
 - Video recording and slides (pdf) after event (via email and posted to www.saras.gov.ge)
 - Next webinar is planned for mid-April will focus on business diversification
